

Jhon Wilfred Drio

AI Full-Stack Developer & Systems Automation Engineer

Navotas City, Philippines · 09085918691 · jhonwilfreddrio@gmail.com · jhonwilfreddrio.netlify.app · kpicktradingcorp.com

PROFESSIONAL SUMMARY

BSIT graduate and Systems & Automation Engineer who builds production systems from scratch — ERP-lite platforms, real-time dispatch tools, LLM-powered Telegram bots, and B2B company websites. Skilled in Python (FastAPI), SQL, JavaScript, Docker, and LLM integration via Ollama and open-source models. Proven track record delivering end-to-end solutions in a live business environment, with direct ownership of architecture, deployment, and iteration. Ready to contribute to AI-powered full-stack applications in a fast-moving startup setting.

TECHNICAL SKILLS

Languages	Python · JavaScript · SQL · VBA · HTML · CSS · TypeScript (learning)
Backend / APIs	FastAPI · REST API design · Telegram Bot API · Google Sheets API · Ollama API
Frontend	Vanilla JS · Bootstrap · React (learning) · Responsive Web Design
AI / LLM	Ollama · Qwen 2.5 (14B) · LLM integration · Prompt engineering · Local AI deployment
Databases	PostgreSQL · MySQL · Microsoft SQL Server · Microsoft Access
DevOps / Tools	Docker · Git · Netlify · VS Code · Jupyter · Linux/macOS server admin (Mac Mini M4)
Automation	Process automation · Workflow optimization · Excel VBA / UserForms · Reporting automation

WORK EXPERIENCE

Systems & Automation Engineer

Kpick Trading Corporation · April 2026 – Present · Navotas, Philippines

- Architected and deployed KIRA — an ERP-lite system (FastAPI + PostgreSQL + Docker + Vanilla JS) handling inventory management, order fulfillment, and platform integrations across Shopee, TikTok, Lazada, and SDD for 600+ SKUs.
- Built KORA — a local LLM-powered AI assistant (Ollama + Qwen 2.5 14B) serving as a staff-facing operations chatbot with a custom dark-mode web interface, running entirely on-premise on a Mac Mini M4 server.
- Developed a Telegram Inventory Bot using Python and the Telegram Bot API, enabling real-time stock queries and inventory updates via mobile — eliminating the need for staff to access the web system for routine checks.
- Built kpicktradingcorp.com — a full B2B company website for K-Pick’s Korean medical device distribution brands (Sungshim, EROP, Hansol Bu-Hang), with SEO meta tags, brand showcases, FAQ, and a quote/PO request flow.
- Designed and deployed a real-time Shopee Instant Delivery dispatch system (Node.js + Socket.IO) with dual-panel views, audio alerts, nudge/rush flagging, and flat-file persistence — serving live warehouse operations.
- Implemented RBAC, duplicate order detection, automated backup/startup scripts, and formatted daily operations reporting in .docx via Python — all operating on a self-administered LAN server environment.

Inventory Analyst

Kpick Trading Corporation · February 2026 – April 2026

- Identified systemic inventory data issues and designed corrective workflows using SQL and Excel, directly leading to role expansion into engineering.
- Performed inventory reconciliation across 600+ SKUs; built tracking templates adopted company-wide.

MFP Operator & Technical Support

Optimal Systems Distribution · September 2025 – January 2026

- Managed high-volume document processing pipelines; provided first-line software and hardware troubleshooting.

Service Crew — Unofficial Tech Support Lead

Red Ribbon · May 2023 – July 2025

- Self-assigned as branch technical resource; resolved software/device issues previously escalated externally.

PROJECTS

KIRA — ERP-lite Internal System · FastAPI · PostgreSQL · Docker · JavaScript

Full ERP-lite platform for Kpick Trading Corp: inventory management, order processing, RBAC, duplicate detection, platform mapping, and automated daily reporting. Self-hosted on Mac Mini M4 LAN server.

KORA — Local LLM Operations Assistant · Python · Ollama · Qwen 2.5 · REST API

On-premise AI chatbot for staff with a custom dark-mode UI. Serves operational queries via LLM with a /api/sales-summary endpoint designed for honest, confirmed-data-only reporting behavior.

Shopee Instant Delivery Dispatch System · Node.js · Socket.IO · Web Audio API

Real-time dual-panel dispatch board with per-card flashing alerts, nudge/rush flags, audio notifications, and flat-file JSON persistence. Deployed to live warehouse operations.

Telegram Inventory Bot · Python · Telegram Bot API · Ollama

Mobile-accessible bot enabling staff to query and update inventory in real time via Telegram — reducing dependency on the web system for routine tasks.

kpicktradingcorp.com · HTML · CSS · JavaScript · SEO

Full B2B company website for a Korean medical device distributor. Includes brand showcases, clinical research references, regulatory credentials, FAQ, and a quote/PO request flow.

Ordering System & Attendance Checker · Excel VBA

Production-grade office automation tools with custom UserForms, data validation, and automated reporting — currently in use at Kpick Trading Corp.

EDUCATION

Bachelor of Science in Information Technology

City of Malabon University · 2021 – 2025

- Coursework: Software Development, Database Design (SQL/MySQL), Web Technologies, Networking, UI/UX, Systems Analysis.
- Capstone and academic projects recognized for production-level quality and practical business applicability.
